EXPERIENCE

Consultant in Front-end Software Development | 2021 | *Unify at Amazon – Austin, TX*

Lead front-end developer for the Global Real Estate and Facilities division of Amazon. Collaborating with clients and in-house designers to provide, robust, intuitive, client-acclaimed front-end applications for the GREF organization.

- Led development of a component and template galleries allowing for agile development and migration of wiki pages to meet the new brand guidelines of GREF.
- Responsible for managing multiple project timelines, project scope, contributing design and development enhancements.
- Created a new webpage to give Amazon employee's access to the latest Return to Office information post COVID-19.
- Led front-end development for the GREF internal website overhaul. Ensured that the website met the design standards set by the client while increasing functionality and responsiveness. Efforts allowed Amazon to deliver this project **$228,000** under budget, **eighteen-day** turnaround time, and released to a global audience two months ahead of schedule
- Technology & Tools: HTML, CSS, XWiki Syntax

General Manager | 2017 – 2019
Enjoy Technology – Seattle, WA

Utilized both strong interpersonal and problem-solving skills to oversee the launch, recruitment, and development of the Seattle Market for Enjoy Technology. Resulting in a strong sales team that delivered exceptional customer experiences while exceeding company goals.
Key Accomplishments:
- Supervised a team of nineteen sales representatives and six fulfilment.
- Developed sales tracking analysis tools that went on to be utilized company wide
- Enabled employees to reach company sales goals while maintaining expectational customer services scores.
